PROFILE SUMMARY

Full-Stack Software Engineer with 2.5+ years of experience architecting scalable web applications using React.js, Node.js, Express.js, and MongoDB. Specialized in Keycloak IAM, OAuth 2.0, OpenID Connect, and RBAC, with expertise in secure RESTful APIs, Docker containerization, and CI/CD. Proven track record automating identity workflows across **250+ higher education institutions** and delivering mission-critical examination and evaluation platforms.

SKILLS

Languages:	JavaScript (ES6+), Python, Java, C, SQL
Frontend:	React.js, Redux, Context API, Bootstrap, HTML5, CSS3
Backend & APIs:	Node.js, Express.js, Django, RESTful APIs, Microservices Architecture
Identity & Security:	Keycloak (IAM, Realms, Clients, RBAC, SSO, OAuth 2.0, OpenID Connect), JWT
Databases:	MongoDB, MySQL, Mongoose ODM
DevOps & Tools:	Docker, Jenkins, Git, GitHub Actions, CI/CD, Postman, Linux

WORK EXPERIENCE

PSG Software Technologies — Software Engineer — Jan 2024 – Present | Coimbatore, India

- **Architected** a centralized **Keycloak IAM module** (MERN) automating realm, client, and RBAC provisioning across **250+ government colleges**, reducing onboarding turnaround by **70%**.
- **Constructed** mission-critical examination lifecycle pipelines (Node.js & MongoDB) for student enrollment, batch allocation, mark entry, and moderation for **50,000+ students** with **zero data discrepancies**.
- **Designed** extensible MongoDB data models and REST APIs managing **40+ degree regulations**, grading rules, evaluation patterns, and OBE curriculum mappings across multi-department curricula.
- **Containerized** backend microservices with **Docker**, reduced database query latency by **45%** via compound MongoDB indexing, and automated **CI/CD** delivery pipelines across production environments.

PROJECTS

MAISON — House Rental Management Platform / *React.js, Node.js, Express.js, MongoDB, REST, JWT* — Live Demo

- **Launched** a full-stack rental platform supporting **100+ property listings** with multi-criteria search, dynamic filtering, and direct inquiry management.
- **Implemented** secure token-based authentication (JWT) and **role-based access control** protecting user profile operations and listing administration.

BuildPulse — Microservices Health & Build Monitor / *Native Node.js, SSE, REST APIs, Docker, Google Chat Webhooks* — GitHub

- **Created** a zero-dependency, real-time Node.js monitor tracking sub-second uptime and latency across **12+ microservices**, cutting incident notification response time by **85%**.
- **Engineered** fault-tolerant health monitoring via asynchronous polling, real-time browser sync via Server-Sent Events (SSE), and Google Chat webhook alerts.

NAAC Accreditation Web Portal / *HTML5, CSS3, JavaScript* — Live Demo

- **Spearheaded** an institutional compliance portal digitizing **500+ accreditation records** across 7 criteria modules, accelerating peer evaluation committee audit cycles by **60%**.
- **Enhanced** asset delivery and navigation taxonomy across all viewports, ensuring **sub-second document retrieval** and high accessibility compliance.

EDUCATION

Park College of Engineering & Technology — B.E. in Computer Science & Engineering — Oct 2020 – Jun 2024 | CGPA: **7.91 / 10.0**

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

CERTIFICATIONS

Full Stack Development — Infosys (2024) • **JavaScript (Intermediate)** — HackerRank (2023) • **Python Programming** — Guvi (2023)
